# ESA SEB STATS WORKSHOP

## When Log-Transforming Is Not Enough: An Introduction to Generalized Linear Mixed Models in R

**Date:** Wednesday, March 11, 2026

**Time:** 8:00AM – 12:00 PM

**Location:** OMNI Hilton Hotel, May 2

### Workshop Overview

- 🦋 Tired of forcing your data into linear models that don't quite fit? This workshop introduces the power of **Generalized Linear Mixed Models (GLMMs)**, with practical demonstrations in **R**. Learn how to model count data using the right tools for modern ecological and entomological data.
- 🦋 Ideal for graduate students, postdocs, faculty, and researchers, this interactive session blends theory and hands-on practice in R.

### Presentations

Session 1: Overview of the process of model building, diagnostics, and inference  
Session 2: A worked example of a split-plot experiment with count data in R

### Workshop Organizers

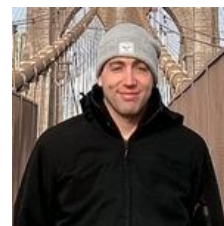

Allan Busuulwa  
[abusuulwa@ufl.edu](mailto:abusuulwa@ufl.edu)

Phil Hahn  
[hahnp@ufl.edu](mailto:hahnp@ufl.edu)

Alex Bauer  
[bauer.a@ufl.edu](mailto:bauer.a@ufl.edu)

Jake Herschberger  
[j.herschberger@ufl.edu](mailto:j.herschberger@ufl.edu)

Register:

- ✓ To register, <https://forms.cloud.microsoft/r/NsYeLQhyDF>
  - ✓ No prior experience with GLMMs required.
  - ✓ Familiarity with basic statistics and R is helpful.
  - ✓ Bring a laptop.
